

**CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
SAN DIEGO REGION**

INVESTIGATIVE ORDER NO. R9-2008-0023

**RICHARDSON BROTHERS INVESTMENTS AND
E&F RICHARDSON INVESTMENTS, LLC
(GARY'S AUTO/RV SERVICE)
1540 SOUTH COAST HIGHWAY
OCEANSIDE, CALIFORNIA**

Pursuant to California Water Code Section 13267 the California Regional Water Quality Control Board, San Diego Region (herein after Regional Board) finds:

- 1. Unauthorized Discharge of Waste.** In 1999, an unauthorized discharge of petroleum hydrocarbon waste to soil was discovered at Gary's Auto/RV Service located at 1540 South Coast Highway, Oceanside, San Diego County, California. The waste was discharged from the underground storage tank (UST) system located on the property. Total recoverable petroleum hydrocarbons (TRPH) was detected at concentrations up to 2,800 mg/kg in samples collected from the tank cavity and fill line during the tank removal.
- 2. Parties Responsible for the Discharge.** Richardson Brothers Investments and E&F Richardson Investments, LLC (hereinafter the Dischargers) are the parties responsible for the discharge. At the time of the unauthorized discharge of waste, Richardson Brothers Investments owned the UST system on the property. As the owner of the UST system, Richardson Brothers Investments caused the initial discharge of petroleum waste to soil at the facility. As current owner of the property, E&F Richardson Investments, LLC is also responsible for corrective action and reporting regarding the waste discharge on their property. The records for the case indicate that Rowena S. Richardson and Michael F. Richardson are the contacts for Richardson Brothers Investments and E&F Richardson Investments, LLC, respectively.
- 3. California Code of Regulations Chapter 16 Requirements.** California Code of Regulations (CCR) Title 23, Division 3, Chapter 16, Article 11 applies to responsible parties for an UST whenever there is any reportable unauthorized release. Applicable requirements of Chapter 16 including the following:
 - a. CCR, Section 2652 (d) requires submission of reports to the local agency or Regional Water Quality Control Board every three months until investigation and cleanup are complete.

- b. CCR, Section 2654 requires that in the event of an undocumented release, an initial site characterization is performed, providing data including the nature and estimated quantity of the release; water quality, use and approximate locations of wells potentially affected by the release.
 - c. CCR, Section 2722 (c) requires the responsible party to submit a workplan for Proposed activities under the Preliminary Site Assessment Phase, if directed by the regulatory agency.
 - d. CCR, Section 2723 specifies that the Preliminary Site Assessment Phase includes the initial site characterization specified in Section 2654 and reporting must be conducted according to Section 2562.
4. **Necessity of Reporting.** A Preliminary Site Assessment is required to comply with 23 CCR Chapter 16 Sections 2654 and 2723. In September 1999 an assessment was conducted at the site; however, borings near the former tank cavity did not extend to the depth of the previous detections of TRPH. Consequently, the information in the record for this case is insufficient to determine the nature and quantity of the release or determine if the release poses a threat to human health or the environment. The workplan for the Preliminary Site Assessment is required pursuant to CCR, Section 2722(c), to allow regulatory review of the proposed activities. Quarterly reporting is required pursuant to Section 2652 (d).
5. **Regulatory Authority.** California Water Code section 13267 provides that the Regional Board can require any person who has discharged, discharges, proposes to discharge or is suspected of having discharged or discharging waste to investigate, monitor, and report information. The burden, including the costs, of preparing the reports must bear a reasonable relationship to the need for and the benefits to be obtained from the reports. These findings provide the Discharger with a written explanation with regard to the need for the reports and identify the evidence that supports the requirement to submit the reports. The associated costs bear a reasonable relationship to the need for the actions, specifically the protection of water quality and beneficial uses in the El Salto hydrologic subarea. The required information and subsequent regulatory review are necessary to determine whether and to what extent the waste discharged has impacted and/or poses a threat to human health or the environment.
6. **Qualified Professionals.** Discharger reliance on qualified professionals promotes proper planning, implementation, and long-term cost-effectiveness

of investigation, and cleanup and abatement activities. Professionals should be qualified, licensed where applicable, and competent and proficient in the fields pertinent to the required activities. California Business and Professions Code Sections 6735, 7835, and 7835.1 require that engineering and geologic evaluations and judgments be performed by or under the direction of registered professionals.

IT IS HEREBY ORDERED, pursuant to section 13267 of the California Water Code, that the Discharger shall submit the following technical and monitoring reports:

A. REPORTS

1. **Workplan for Preliminary Site Assessment Investigation (PSAI).** A workplan is due no later than **May 30, 2008**. The workplan shall include the proposed actions and a proposed schedule for their completion as required by CCR Section 2723 (d). The workplan shall include a discussion of the conceptual site model and how the proposed actions will address data gaps in the conceptual site model.
2. **Preliminary Site Assessment Report:** The Preliminary Site Investigation Report is due no later than **July 30, 2008**. The report shall describe the activities conducted under the Workplan for Preliminary Site Assessment Investigation and provide an update of the conceptual site model. The report must include the following information as required by CCR sections 2653 and 2654:
 - a. Data on the nature and estimated quantity of the release. To assess the nature of the release analytical data should be provided for total recoverable petroleum hydrocarbons (TRPH), benzene, toluene, ethylbenzene, total xylenes, (BTEX) methyl tertiary butyl ether (MTBE), tertiary butyl alcohol (TBA) and other fuel oxygenates). The estimation of quantity of the release should be based on lateral and vertical delineation of contaminated soil, groundwater, and free product and specifically address whether contaminated soils are or may be in contact with surface water or groundwater.
 - b. Status of investigations to determine the possible presence of free product.
 - c. Characterization of the geology and hydrogeology of the site with respect to transport of the wastes. The characterization shall include

a discussion of subsurface soil conditions, locations of subsurface utilities, climatological conditions, and land use.

- d. Evaluation of the impacts of the wastes on all existing and future sensitive receptors that could be affected by the wastes.

The Preliminary Site Assessment Report should be submitted to the Regional Board no later than July 30, 2008.

3. **Quarterly Reports:** Until investigation and cleanup are complete, reports shall be submitted to the Regional Board every three months. Reports shall include but not be limited to:

- a. An update on any investigation, monitoring, corrective or remedial actions which have occurred during the reporting period.
- b. The method of cleanup implemented to date, proposed cleanup actions, and a time schedule for implementing the proposed actions.

Quarterly Reports shall be submitted according to the following schedule:

Monitoring Period	Due Date for Report
First Quarter (January –March)	Due no later than April 30
Second Quarter (April-June)	Due no later than July 30
Third Quarter (July-September)	Due no later than October 30
Fourth Quarter (October-December)	Due no later than January 30

B. PROVISIONS

1. **Contractor/Consultant Qualifications:** All reports, plans and documents required under this Order shall be prepared under the direction of appropriately qualified professionals. The lead professional performing engineering and geologic evaluations and judgments shall sign and affix their professional geologist or civil engineering registration stamp to all technical reports, plans or documents submitted the Regional Board. ..
2. **Lab Qualifications:** All samples must be analyzed by California State-certified laboratories using approved EPA methods for the type of analysis to be performed. All laboratories must maintain quality assurance/quality control (QA/QC) records for Regional Board review.

3. **Reporting of Changed Owner or Operator:** The Discharger must notify the Regional Board of any changes in site occupancy or ownership associated with the property described in this Order.
4. **Penalty of Perjury Statement** All reports must be signed by the Discharger's principal executive officer or their duly authorized representative, and must include a statement by the official, under penalty of perjury, that the report is true and correct to the best of the official's knowledge.
5. **Electronic Data Submittals:** All information submitted to the Regional Board in compliance with this Order in paper copy format is also required to be submitted electronically via the Internet into the GeoTracker database. To comply with section 3893, Title 23, CCR; your update to the Geotracker database must include the following minimum information:
 - a. Data generated after the effective date of the regulations by chemical analysis of soil, vapor, or water samples (including surface water, groundwater and influent/effluent water samples from remediation systems), shall be submitted in Electric Data File (EDF) format.
 - b. The latitude and longitude of any permanent monitoring well for which data is reported in EDF format, accurate to within 1 meter and referenced to a minimum of two reference points from the California Spatial Reference System (CSRS-H), if available.
 - c. The surveyed elevation relative to a geodetic datum of any permanent monitoring well.
 - d. The elevation of groundwater in any permanent monitoring well relative to the surveyed elevation.
 - e. A site map or maps showing the location of all sampling points referred to in the report.
 - f. The depth to the screened interval and the length of screened interval for any permanent monitoring well.
 - g. Boring logs, in PDF format.

- h. A complete copy of the report, in PDF format, which includes the signed transmittal letter and professional certification.

The GeoTracker website address is
<http://www.geotracker.waterboards.ca.gov>. Deadlines for electronic
submittals coincide with deadlines for paper copy submittals.

Dated this 20th day of March 2008

BY THE EXECUTIVE OFFICER

MICHAEL P. McCANN
Assistant Executive Officer

the Assistant Executive Officer

NOTIFICATIONS

1. Failure to comply with the requirements of this order may subject you to enforcement action, including but not limited to: imposition of administrative civil liability under water code section 13268 or referral to the attorney general for injunctive relief or civil or criminal liability
2. Any person affected by this action of the Regional Board to require certain technical or monitoring reports under Water Code section 13267 may petition the State Water Resources Control Board (State Water Board) to review the action in accordance with Section 13320 of the California Water Code and Title 23, California Code of Regulations, Section 2050. The petition must be received by the State Water Board, Office of Chief Counsel, P.O. Box 100, Sacramento, California 95812, within 30 days of the date of this Final Order. Fees of the law and regulations applicable to filing petitions will be paid upon request.
